

### 7/8 Carline Instructions

1. When entering the 7/8 drop-off lane from Foothill Boulevard, be aware that left turns from Foothill Boulevard are **not** permitted during morning/afternoon peak hours.
2. Please remember 7/8 turnaround is a moving carline. Do not block traffic or the entrance to the parking areas while in the carline. Please park in a designated area if you need to get out of your car.
3. All cars should move forward as much as possible in both the carline and turnaround area. Please do not stop the carline flow to wait for your student before joining the 7/8 circle. Keep moving forward towards the circle as the flow continues. **(Do not expect or encourage other cars to pass in front of you before joining the circle—please continue moving forward when there is room in the circle).**
4. Once you are at the circle, **continue to move forward with the carline** as it is moving in front of you.
5. Talk to your child about looking for your car while he/she is waiting during pick up times. Remind your student to look for your car in the upper area of our traffic circle, where it may **not be as visible**.
6. When **exiting** the 7/8 drop-off lane onto Foothill Boulevard, both right and left turns are permitted.
7. **Review these procedures with your children and anyone picking up or dropping off your children.**

For your children's safety, please limit your **cell phone use** while you are in the carline. As of July 1<sup>st</sup>, 2008, motorists 18 and over may only use a "hands-free device." Drivers under the age of 18 may NOT use a wireless telephone or hands-free device while operating a motor vehicle.
